

SUMMARY

Power BI & Visualization Expert / Analytics Engineer with 2+ years of experience specialized in crafting high-impact reporting solutions and scalable data pipelines. Expert in transforming complex raw data into intuitive, analytics-ready datasets using Power BI, SQL, and Microsoft Fabric. Proven track record of bridging the gap between deep technical data engineering and executive-level business intelligence to drive data-informed decision-making.

SKILLS

Visualization:	Power BI, Dashboarding, KPI Design, Data Visualization, Figma
Data Engineering:	Microsoft Fabric, Data Factory, SQL (Advanced), ETL/ELT Pipelines, Medallion Architecture, Lakehouse
Languages & Tools:	Python (Pandas, NumPy, PySpark), MySQL, MariaDB, Git, VS Code, Claude Code, Power BI MCP
Architecting:	Data Modeling, Star Schema, Data Warehousing

TECHNICAL EXPERIENCE

Data Visualization Analyst	Jan 2023 – Jun 2026
Freelance / Project-Based	Remote

- Dashboarding:** Engineered high-performance Power BI dashboards tracking 15+ cross-functional KPIs, significantly accelerating executive decision-making.
- Unified Analytics:** Formulated a standardized sales and finance data layer, aligning disjointed division reporting and establishing a single source of truth.
- Fabric Integration:** Orchestrated robust data integration pipelines within Microsoft Fabric to ingest, transform, and map structured semantic models.
- Data Optimization:** Restructured legacy operational databases into highly optimized Star Schema designs, cutting report visual load latency by 40%.

Client Projects	External Deliverables
Manufacturing Client & Mavask Pvt Ltd	

- Manufacturing Client:** Modeled automated real-time diagnostic intelligence dashboards to actively profile, validate, and isolate data quality anomalies across complex manufacturing system log sequences.
- Mavask Pvt Ltd (School Resource Management Dashboards):** Architected an end-to-end, multi-tenant enterprise analytics ecosystem using Power BI. Delivered 4 distinct role-tailored security views and interactive metric layouts serving Admins, Teachers, Students, and Parents. Enhanced query efficiency by restructuring intricate, granular relational models linking faculty and administrative metrics.

LEARNING & DEVELOPMENT (HANDS-ON PROJECTS)

Sales & Finance Full-Stack Fabric Platform	Personal Development
--	----------------------

- Implemented a multi-stage Medallion architecture (Bronze, Silver, Gold layers) using Microsoft Fabric and PySpark to scrub, enforce schemas, and aggregate messy raw Parquet file stores.
- Automated cyclical processing flows by provisioning Data Factory scheduling patterns, mitigating operational manual ingestion bottlenecks by 100%.
- Conceptualized dynamic semantic layouts and complex DAX business measures to provide predictive analysis over leadership sales trend metrics.

Logistics & Supply Chain Reporting Tool	Personal Development
---	----------------------

- Developed a self-contained, automated tracking system that reclaimed 60% of weekly hours previously lost to manual data cleaning overhead for inventory and shipping tables.
- Leveraged Claude Code alongside Power BI tools to clean, regularize, and ingest unstructured data payloads with 100% metric reporting fidelity.

CERTIFICATIONS

Microsoft Certified Systems Administrator: Data Engineering with Azure – NetCom Learning	Dec 2021
Programming Essentials in Python – OpenEDG	May 2024
Analyzing and Visualizing Data with Microsoft Power BI – Curbal	Mar 2020
SQL Fundamentals – Sololearn	Sep 2019

EDUCATION

Master of Computer Applications (MCA)

Gyan Ganga Institute of Technology and Sciences (GGITS)

Bachelor of Computer Science

MGP College

Aug 2023 – May 2025

Jabalpur, MP, India

Aug 2019 – May 2021

Narsinghpur, MP, India
