SUMMARY

Power BI & Visualization Expert / Analytics Engineer with 2+ years of experience specialized in crafting high-impact reporting solutions and scalable data pipelines. Expert in transforming complex raw data into intuitive, analytics-ready datasets using Power BI, SQL, and Microsoft Fabric. Proven track record of bridging the gap between deep technical data engineering and executive-level business intelligence to drive data-informed decision-making.

EXPERIENCE/ CLIENT PROJECTS

Data Visualization Analyst | Freelance / Project-Based | Jan 2023 – Dec 2024

Client - 1: Worked for Manufacturing Client |

Create Log Analysis Report

- Designed a Power BI report for analyzing the log.
- Design dashboard for data quality and validation.

Create data quality and validation check report

Client - 2: Worked for Mavask Pvt Ltd | School Resource Management Dashboards

- Designed and developed an end-to-end educational resource management analytics solution using Power BI.
- Created tailored, role-specific interactive dashboards providing distinct layouts and metrics for Admins, Teachers, Students, and Parents.
- Optimized data models to efficiently handle complex relational data between students, faculty, and school administration metrics.

LEARNING AND DEVELOPMENT (Hands on projects)

Sales & Finance Full-Stack Fabric Platform

- Built a Medallion architecture (Bronze/Silver/Gold) using **Fabric** and **PySpark** to clean and process raw Parquet data.
- Designed **Data Factory pipelines** to fully automate scheduled data updates, eliminating manual work.
- Created a clean data model and **Power BI dashboards** to track sales and finance trends for leadership.
- Used **VS Code, Claude Code, and MCP tools** to write PySpark code and complex DAX formulas faster and with fewer errors.

Logistics & Supply Chain Reporting Tool

- Made an automated reporting tool that saved 60% of manual work time for tracking inventory and shipping data.

- Used Power BI, MCP tools, and Claude Code to quickly clean messy data files and make the reports fully accurate.

SKILLS

- Visualization: **Power BI**, Dashboarding, KPI Design, **Data Visualization**, Figma
- Data Engineering: Microsoft Fabric, Data Factory, SQL (Advanced), ETL/ELT Pipelines, Medallion Architecture, Lakehouse
- Languages & Tools: Python (Pandas, NumPy, PySpark), MySQL, MariaDB, Git, VS Code, Claude Code, Power Bi MCP
- Architecting: Data Modeling, Star Schema, Data Warehousing

EDUCATION

Master of Computer Applications (MCA): GGITS Jabalpur | Aug 2023 – May 2025

Bachelor of Computer Science: MGPG College Narsinghpur | Aug 2019 – May 2021
